# **Thanh Tran**

0410 379 767 | kimthanh932000@gmail.com | Perth, WA https://www.linkedin.com/in/kim-thanh-tran-217b40208/

### **PROFILE**

Web developer with 4+ years of experience in the field, with a strong focus on frontend technologies such as ReactJS and NextJS. Passionate about building clean, responsive, and user-friendly interfaces that enhance usability and accessibility. Currently pursuing a Master of Computer Science at Edith Cowan University to enhance my skills and broaden my knowledge of emerging technologies.

### **WORK EXPERIENCE**

KAMORA Studio (Da Nang, Viet Nam)

**Frontend Developer** (10/2019 – 01/2024)

Key responsibilities:

- Led a small frontend team, providing guidance, task coordination, and performance feedback
- Developed and maintained the web interface for the company's core product, focusing on responsiveness, accessibility, and user experience
- Integrated performance optimisation techniques, reducing website load time by 30%
- Collaborated with UI/UX designers, backend developers, and QA testers to deliver high-quality features under Agile methodology
- Implemented SEO best practices, increasing website visibility and traffic
- Developed internal libraries for use across multiple projects, which shortened development time for new features

### **TECHNICAL SKILLS**

- Languages: Javascript, HTML/CSS, C#
- Frameworks/Libraries: ASP.NET, ReactJS, NextJS, GastbyJS, VueJS, NodeJS, ExpressJS, GraphQL
- Databases: SQL Server, MySQL
- Tools: WebStorm, Visual Studio, VS Code, Git, Slack, Redmine

## **EDUCATION**

**Master of Computer Science** (02/2024 – 11/2025)

Edith Cowan University – Perth, Australia

**Bachelor of Software Engineering** (05/2016 – 09/2019)

FPT University - Ho Chi Minh, Viet Nam

**Diploma of Information Technology** (09/2013 – 10/2015)

Swinburne University of Technology – Melbourne, Australia

### RELEVANT EXPERIENCE

Wisky (Ho Chi Minh, Viet Nam)

# **Intern Software Developer** (2019)

Key responsibilities:

- Collaborated in a small team to maintain and upgrade an internal system used to track staff attendance for a local coffee franchise
- Contributed to developing and testing new features based on user feedback and system requirements
- Conducted routine bug fixes, performance improvements, and backend updates to ensure system reliability

#### Skills/Competencies developed:

- Real-world experience with maintaining production systems
- Backend feature development and troubleshooting
- Effective communication, teamwork, and problem-solving in a fast-paced environment

Bachelor of Software Engineering (FPT University, Ho Chi Minh, Viet Nam) **Capstone Project** (2019)

- Worked in a team to design and develop a secure digital voting system as a graduation capstone project
- Integrated blockchain technology to ensure transparency, tamper-resistance, and traceability of votes
- Developed the system using C# for the frontend and NodeJS for backend services and blockchain integration
- Participated in system design, coding, testing, and documentation phases of the software development lifecycle

# Skills/Competencies developed:

- Blockchain fundamentals and smart contract design
- Full-stack development using C# and NodeJS
- Agile teamwork, version control with Git, and technical documentation
